

STUDENT HIVE

CS 691 – Computer Science Capstone Project

AGENDA

AGENDA

- Review progress towards project deadlines and milestones and discuss any delays or challenges encountered and identify solutions.
- Ensure alignment on the development progress and tasks completed and address any roadblocks hindering development and strategize solutions.
- Mark important submission dates and deadlines for the project deliverables on the shared excel sheet with everyone's schedules.
- Review presentation topics to ensure they align with project goals and discuss iterative updates to the presentation and delegate tasks accordingly.
- Brainstorm and study through personas to understand client requirements thoroughly and Identify and prioritize the necessary features and functionalities from the client's perspective.
- Discuss potential risks associated with the project and their impact and Strategize mitigation plans to address identified risks effectively.
- Emphasize the importance of interaction, attendance, cooperation, teamwork and discuss the significance of individual contributions and attention to detail for project success.
- Sync on the next steps for development, including task assignments, deadlines and Outline action items and responsibilities for each team member.
- Recap key discussion points and action items also confirm the date and time for the next meeting, if necessary and ensure open communication and collaboration among team members.

IMPROVEMENTS

PROFESSOR FEEDBACK

- Adherence to User Stories Syntax.
- Distinguishing between Task and Issue.
- Avoiding Image Compression in Slides.
- Utilizing Burndown Chart for Progress Tracking .
- Adding Numbers to Completed and Committed Ratio.

IMPROVEMENTS MADE FROM PROFESSOR FEEDBACK

- We corrected user story syntax through thorough review and training.
- We improved task and issue differentiation with standardized labels and team discussions.
- We eliminated image compression by using higher-quality resources and appropriate file formats.
- We enhanced progress tracking with consistent burndown chart usage.
- We increased reporting accuracy by adding numerical data to completed and committed ratios.

TEAM WORKING AGREEMENT

Team Working Agreement

Purpose of the agreement:

To complete Computer Science Project 1(CS 691) as smoothly as possible.

Name of the Project:

StudentHive

Terms of Agreement:

- All the team members are expected to attend the weekly meetings (Wednesday 8:00 PM) without fail.
- If in any case you are not able to join the call, you are expected to update the other team members regarding your absence.
- In the case of absence from a weekly meeting, you are expected to make it up before the next team meeting.
- The weekly meetings are held on zoom and any updates can be communicated through WhatsApp messenger.
- GitHub can be used to track and divide all our work.
- You are expected to be active on the WhatsApp messenger group chat for any updates.
- Work should be divided equally amongst the peers.
- Each team member should complete the work before the deadline. In case you are not able to do so, inform your peers so that they can divide the work accordingly. Failing to do so might lead to a decrease in the Team's grade.
- The Scrum Master is responsible for organizing the weekly meets, and everybody should be open to meet virtually more than once weekly if the situation demands it.
- Every team member is expected to be active in the weekly meetings, be productive and open to discussions and give a timely update on their part of the work.

Team Members:

- Bhanushali, Smit
- Gowdru Karibasappa, Sujan Siddarth
- Nandula Matham, Kiran Kumar
- Patel, Yashkumar
- Patel, Parth Animeshkumar
- Patel, Siddharthkumar Kamleshbhai
- Velamarthi, Rajkoushik

PROJECT DESCRIPTION

PROJECT DESCRIPTION

"Student Hive" is a secure and convenient platform designed for students seeking shared living arrangements. By registering with their school email, users gain access to comprehensive listings tailored to their accommodation preferences and budgeting needs. Advanced search options and communication tools facilitate connections with potential roommates or landlords, while additional resources such as transportation information and nearby amenities enhance the overall living experience. With support and community engagement features available, "Student Hive" empowers students to confidently navigate their search and find the perfect accommodation suited to their needs.

PERSONAS

PERSONA 1: EMILY, BUDGET-CONSCIOUS STUDENT

Name: Emily

Age: 25

Location: Pacific Northwest, USA

Salary: \$20,000 per year

Job: Graduate Student Research Assistant

Family: Single, no children

Profile: Emily is a dedicated graduate student who balances her studies with a part-time job, all while living a sustainable lifestyle.

Interests: Environmental science, outdoor activities, sustainable living practices.

Frustrations: Difficulty in finding affordable, eco-friendly housing near campus and compatible roommates.

Goals: To live in an affordable, sustainable home close to campus with roommates who share her eco-conscious values.

PERSONA 2: ALEX, INTERN/CO-OP SEEKER

Name: Alex

Age: 22

Location: NY , USA

Salary: \$8,000 (Summer Internship Stipend)

Job: Undergraduate Computer Science Student/Intern

Family: Single, no children

Profile: Alex is a focused computer science student and intern, seeking convenient housing to support her summer internship and interests.

Interests: Coding, gaming, tech meetups.

Frustrations: Challenges in finding short-term, furnished, affordable housing close to her internship.

Goals: To find flexible housing that enables her to concentrate on his internship and personal tech projects.

PERSONA 3: JORDAN, GRADUATE STUDENT/YOUNG PROFESSIONAL

Name: Jordan

Age: 27

Location: Austin, Texas, or similar vibrant city

Salary: \$50,000 per year

Job: Marketing Professional/Graduate Student

Family: Single, no children

Profile: Jordan is an ambitious marketing professional and potential graduate student, seeking a lifestyle balance in an urban environment.

Interests: Photography, social media, urban exploration, cafes, co-working spaces.

Frustrations: Finding an affordable place in a desirable neighborhood that caters to her professional and social needs.

Goals: To secure a living situation that aligns with her aspirations for career growth and an active social life in a dynamic neighborhood.

ACCEPTANCE CRITERIA

Issue Type	ID	Summary	Acceptance Criteria	Place
Feature	1	Sign up with personal email	Scenario: New user registration Given the user is on the Sign-Up page When the user inputs a personal email address and completes the registration form Then the user receives a confirmation email to complete the signup process	Login Page
Feature	2	Verify student status with educational email	Scenario: Verifying student status Given the user has signed up with a personal email When the user enters an educational email address for verification Then the user receives a verification email at the educational email address And upon clicking the verification link, the user's profile is marked as verified	Manage Profile
Feature	3	Sign in with personal email	Scenario: User login Given the user has an account When the user enters their personal email and password on the login page Then the user is successfully logged into their account	Login Page
Feature	4	Password reset functionality	Scenario: Resetting a forgotten password Given the user has forgotten their password When the user clicks on "Forgot Password" and enters their email address Then the user receives a password reset email And upon following the instructions in the email, the user can successfully reset their password	Login Page
Feature	5	Browse listings with a map view	Scenario: Viewing listings on a map Given the user is on the Home Page When the user navigates to the map view of listings Then the user can see pins on the map representing available accommodations	Home Page
Feature	6	Filter listings by accommodation type	Scenario: Filtering listings by accommodation type Given the user is on the Listings Page When the user selects an accommodation type (shared, private) from the filter options Then the listings are updated to only show the selected accommodation type	Home Page
Feature	7	Filter listings by number of bedrooms	Scenario: Filtering listings by bedrooms Given the user is on the Listings Page When the user selects a specific number of bedrooms from the filter options Then the listings are updated to only show options with the selected number of bedrooms	Home Page
Feature	8	Filter listings by price	Scenario: Filtering listings by price Given the user is on the Listings Page When the user specifies a price range Then the listings are updated to only show options within the specified price range	Home Page

ACCEPTANCE CRITERIA

Feature	9	Create a listing	Scenario: Creating a new listing Given the user is logged in and on the Create Listing page When the user inputs all required details for the listing and submits it Then the listing is created and visible on the platform	Create Listing Page
Feature	10	Edit a listing	Scenario: Editing an existing listing Given the user is logged in and owns a listing When the user edits the listing details and saves the changes Then the updated listing reflects the changes made	Manage Listings Page
Feature	11	Remove a listing	Scenario: Removing a listing Given the user is logged in and owns a listing When the user chooses to remove one of their listings Then the listing is no longer visible on the platform	Manage Listings Page
Feature	12	View listing details	Scenario: Viewing detailed listing information Given the user is browsing listings When the user selects a listing to view more details Then the user is presented with detailed information including amenities, price, and location	Listing Page
Feature	13	Manage profile information	Scenario: Updating profile information Given the user is logged in When the user goes to Profile Settings and updates their information Then the user's profile information is updated accordingly	Mange Profile
Feature	14	Direct communication with potential roommates or landlords	Scenario: Messaging a listing owner Given the user is interested in a listing When the user sends a message to the listing owner via the platform's messaging feature Then the message is successfully sent and can be viewed in the Messages section	Messages Page
Feature	15	Manage messages from other users	Scenario: Managing received messages Given the user is logged in and has received messages When the user goes to the Messages section to view and respond to messages Then the user can successfully manage their messages including reading, replying to, and deleting messages	Messages Page

TEST CASES

Test Case ID	User Story	Unit to Test	Assumptions	Test Data	Steps to be Executed	Expected Results
TC15	SH-26	University Preference Component	User is logged in and on the profile page	Preferred university: PACE University	1. Go to Manage and University page. 2. Click on "Edit University"	Preferred university is updated.
TC16	SH-27	Password Update Component	User is logged in and on the account setting page	Current and new password	1. Go to Manage and Password page. 2. Click on "Change Password"	Password is successfully updated.
TC17	SH-28	Messages Component	User is logged in and on the messages page	Message content: "Hello"	1. Go to Manage and messages page. 2. Select a contact	The message is successfully sent.
TC18	SH-29	Create Listings Component	User is logged in and on the create listing page	Listing details: Apartment with 2 bedrooms	1. Go to Manage and Profile Page. Create listing page. 2. Fill in the details	The new listing is successfully created.

RETROSPECTIVE

WHAT WENT WELL

- Efficient communication within the team facilitated smooth progress.
- Timely completion of milestones ensured project stayed on track.
- Flexibility in adapting to unforeseen challenges led to innovative problem-solving.

WHAT NEEDS IMPROVEMENTS

- Clarifying roles and responsibilities to avoid overlaps and streamline workflow.
- Enhancing documentation to improve knowledge sharing and onboarding.
- Implementing stronger risk management strategies to mitigate potential setbacks.

NEXT STEPS

- Conducting a thorough post analysis to extract valuable lessons learned.
- Refining project management processes based on retrospective findings.
- Implementing actionable insights to enhance efficiency and effectiveness in future endeavors.
